

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

72675A

1,250 Lbs. Capacity Powertrain Lift / Table

INTENDED USE

The powertrain lift/table not only handles transmissions and fuel tanks, but also engines and transaxles, rear ends and leaf springs. Also serves as a work table where the components can be lowered to a stable and secure work height for repair.

FEATURES

- An air/hydraulic foot pump includes a metered valve for safe lowering of the load.
- Safety overload system in the air/hydraulic pump prevents jack from being used beyond the ASME/PASE load-limiting standard
- The pump can be removed from its holder and placed closer to the lift saddle, leaving hands free to accurately position the load.
- Fully adjustable saddle with two ratchet tie downs secure the load to the saddle.
- Four swivel ball bearing caster wheels with polyurethane tread protect floors yet provide easy maneuverability.
- The rear caster wheels have a double locking feature. One lock prevents the rear wheels from turning when the lift is used in a repair mode. The other locks the rear casters in a fixed direction to provide steering ability.
- The optional model 72508 Fuel Tank Saddle Adapter can be quickly and easily installed.
