

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

71335

3 1/2 Ton Capacity SUV & Service Truck Jack

INTENDED USE

A heavy-duty floor jack designed for a variety of automotive shop uses including the added capacity and maximum lift height required to handle most SUV and 1 Ton+ service trucks.

FEATURES

- U.S. Patent No. D683104 & 9,022,356
- Steel hydraulic block construction includes a double pump piston design that quickly raises the jack to the maximum height
- 50" long, removable two piece handle with knurled hand grip provides:
 - Ease of pumping
 - Longer reach for positioning under overhang
 - Ease for transportation and storage
 - Ease of pumping in tight quarters when second handle section is removed
- 4" low and 21-3/8" maximum lift heights (without saddle adapter)
- 7" low and 24-3/8" maximum lift heights (with saddle adapter)
- Heavy-duty chassis for added strength and dependability
- Safety bypass and overload systems prevent cylinder damage and prevent the jack from being used beyond the ASME/PASE load-limiting standard.

Also available is our unique 3" saddle extension adapter (Model #71303). Its Patent Pending design has been created to quickly lift the load. Since most SUV's and Service Trucks have a higher low lift height, the increased height of the saddle allows for quicker positioning and quicker lifting of the vehicle. It saves time and effort and increases shop efficiency.

Double Pump Piston
